Project PHaEDRA - Annie Jump Cannon 33

Extracted on Apr-20-2024 09:21:29

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Harvard-Smithsonian Center for Astrophysics as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Harvard-Smithsonian Center for Astrophysics website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Harvard-Smithsonian Center for Astrophysics or transcribe@si.edu

For more information on this project and related material, contact the Harvard-Smithsonian Center for Astrophysics. [See this project](#) and other collections in the Smithsonian Transcription Center.

10

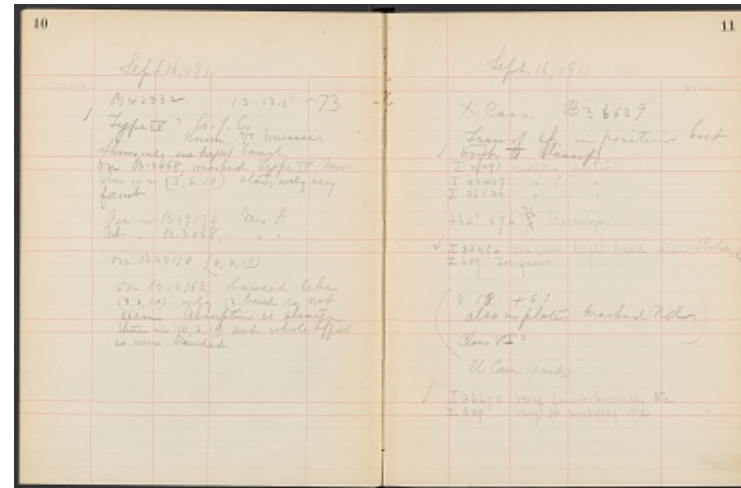

Sept. 16, 1911

B 42332 13 13.5 -73
Type IV? A.J.C.
Known, tau Muscae
Shows only one bright band.
On B 13468, marked Type IV. New.
This is a (3,6,10) star only very faint.

Pec. on B 39170 Mrs. F.
Mb on B 13468, Mrs. F.

on B 39170 (0,4,10)

On B 13763, banded like (3,6,10) only (3) band is not seen. Absorption is stronger than in (0,6,10) and whole effect is more banded.

11

Sept. 16, 1911

chi Cass. B 36639
Trace of sp. in position but too ft. to classify.
I 2291 nothing seen
I 33407 nothing seen
I 36820 nothing seen.

+62° 596 ~~zeta~~ ~~mu~~ Camelop.
I 33486 One faint bright band seen. Probably Na.
I 659 Too faint.

(3 58 +61 Also on plate. Marked Nd Class VI?)

U Cam (cont.)
I 36670 very faint probably Na
I 639 very ft. probably Na.

Harvard-Smithsonian Center for Astrophysics

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
