Dec. 3 Caught 3 Dipodops & a Geomys & a Hesperomys l. sonoriensis. Reset & baited the traps, will try one night more to catch Perognathus. In P.M. went out among the mesquit brush E. of town. Found a few birds & killed a Thyrothorus, found holes & tracks of the big Dipodomys & some little Perognathus holes. Saw lots of Rabbits of both kinds. Saw a Coyote in morning, but not near enough for a shot. Warm in morning & warm all day. Saw 3 lizzards & shot one.

" [[ditto for Dec.]] 4 Caught a Geomys & 2 Dipodops. Took up traps & in P.M. set them out on higher grounds east of town. Shot a *Spermophilus spilosoma*. Have had 33 traps set for a week & have not lost one. Tried remodeling some cyclone traps so as to catch Perognathus. They are afraid of traps & dont care for bait. A warm day & cloudy.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
