June 24. Caught some *Tamias* & *Hesperomys* & 2 *Ochetodons* & shot a *Dipodops* & a *Spermophile*. Went to traps & hunted most of A.M. Did not find much because the wind blew & dust flew. Started out again after putting up skins in P.M. but found a horse in the spring & spent all of the time left for hunting helping to get it out. Blistered & skinned my hands too. A cat got in through a window & ate 2 *Spermophile* & 2 *Tamias* skins, spoiled my yesterday's work. Wind blew hard nearly all day & the dust flew so we could not see across the block at times. Not very warm.

" [[Ditto for: June]] 25. Caught 2 *Dipodops* & an *Ochetodon*, & shot a *Spermophile*. Did not catch much & the wind blew so I couldn't find *Spermophiles*. Went over to Cedar Fort depo. Set *Arvicola* traps - 16. A small day's work. Very windy & dusty.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
