June 19 Got an Indian to take me down to the Indian Agency 18 miles from Wadsworth on the east side of the river 3 miles above where it enters Pyramid Lake, and 6 miles from Winnemucca Lake. Winnemucca Lake is known to all the people here as Mud Lake. Followed down the valley on west side of river & crossed near the agency. Saw lots of Pelicans, hundreds of *S. mollis*, 3 or 4 *S. leucurus* & lots of lizzards & hornfrogs. Saw *Crotaphytis* & *Calisaurus*, *Cnemidophorus*, & a little *Scalopus*. Got specimens of all near the agency & killed some *S. mollis* & *S. leucurus*. Caught one *Thomomys*.

There is snow on some of the Mts. around. The valley is not very large & all around are Mts., desert ranges. Plants are all desert species, such as *Atriplex confertifolia*, *Sarcobatus vermicularis*, *Atriplex canescens*, & *torreyi*?, *Suaeda Lyssium* (*andersoni*?), *Tetradymia canescens*, *spinescens*, *Artemisia tridentata*, & *spinescens*. Cottonwoods & willows grow on the flats.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
