USNM Curators Annual Reports - Department of Birds: Reports 1886 - 1887

Extracted on Apr-23-2024 12:08:06

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

U. S. Fish Commission. - 108 specimens, 10 species of water birds from the coasts of Massachusetts and from the Newfoundland banks, collected by the naturalists at Woods Hole, and on board the "Albatross" and the Grampus. The collection is very valuable and interesting containing as it does a series of 44 specimens of Puffinus borealis (which was only described a few years ago and up to date a very rare species in collections), besides very large series of Jaegers, Stercorarius parasiticus and promarinus illustrating the enormous individual color-variations in these birds. Nearly one half of the collection was received in the flesh and was prepared by the taxidermist, who also mounted a great many of them in excellent style for the exhibition series. Only part of the collection were received during October, though for reasons detailed in the report for September first entered in the museum register during the former month.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
