**The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.**

The Smithsonian Institution (the "Smithsonian") provides the content on this website ([transcription.si.edu](https://transcription.si.edu)), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or [transcribe@si.edu](mailto:transcribe@si.edu)

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

[[circled]] 6 [[/circled]]

8th February.

~~8th December~~ ~~arrow right movie on TCC invasion of Normandy.~~  
Gen Dolby-  
states 100 yds = pin point perfection

Col. Coulter says spread is  
1 stick = 10 sec = 1/3 mile (?)

Pathfinder people think that in mass drops - if center of impact is within  
400 yds is excellent.

Actual error in Normandy 1000 yds PFF  
with 717 +/- 1 mile - (troops)  
Pilotage +/- 50 yds -

Rebecca - Eureka

Read excerpt of Knowles letter on PPN -

Hazeton - Storage batteries - not dry cells.  
Hand generator for light weight VHF.

Coulter in Italy having trouble with batteries.

Cant Brown of ETO has same trouble.

Sends resupply by parachute - Wants hand generator without hum - Has  
used glider batteries.

Coulter thinks enough frequency channels now-

Quoted requirement for 176M. on R/E - Will be in APN-12

Col. Leary suggests combining beacons for drop zones - for  
demarcation of front lines, etc.  
(simplification)

## Smithsonian Institution

*Smithsonian National Air and Space Museum Archives*

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
