September 30, 1959

Mr. William H. Amos  
Department of Biological Sciences  
University of Delaware  
Newark, New Jersey

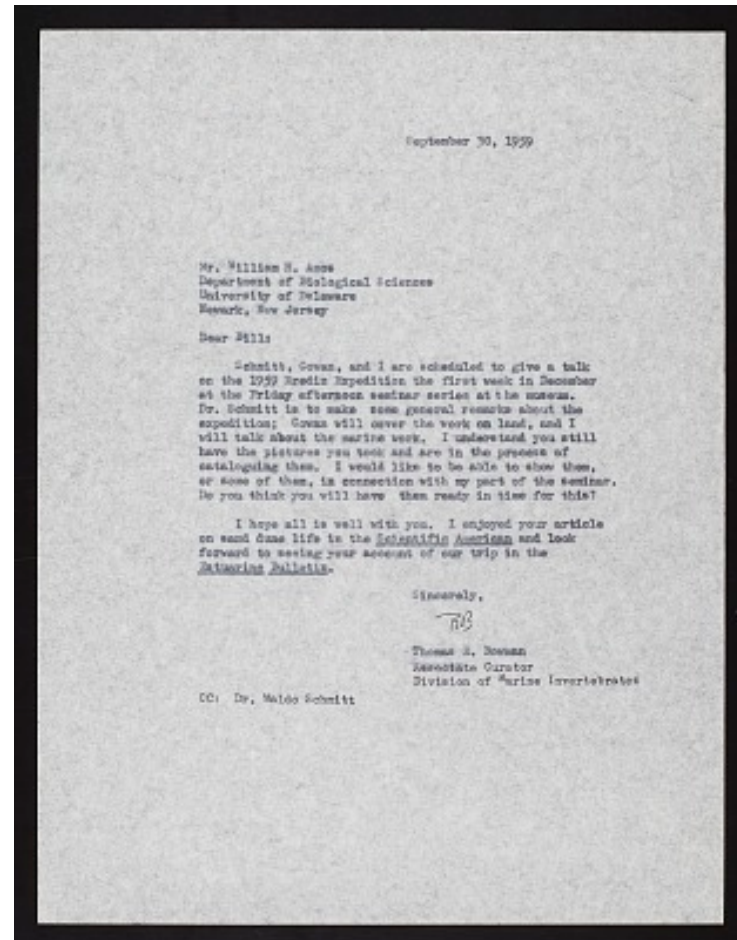

Dear Bill:

Schmitt, Cowan, and I are scheduled to give a talk on the 1959 Bredin Expedition the first week in December at the Friday afternoon seminar series at the museum. Dr. Schmitt is to make some general remarks about the expedition; Cowan will cover the work on land, and I will talk about the marine work. I understand you still have pictures you took and are in the process of cataloguing them. I would like to be able to show them, or some of them, in connection with my part in the seminar. Do you think you will have them ready in time for this?

I hope all is well with you. I enjoyed your article on sand dune life in the Scientific American and look forward to seeing your account of our trip in the Estuarine Bulletin.

Sincerely,  
[[signed - TB]]  
Thomas E. Bowman  
Associate Curator  
Division of Marine Invertebrates

CC: Dr. Waldo Schmitt

## Smithsonian Institution

*Smithsonian Institution Archives*

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
