Devra Kleiman - Colonel notebook (infant golden lion tamarin), 1977

Extracted on Apr-19-2024 05:43:20

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

27 July 77 DAY 18 [[E]] = 25.0cc.

0745 hr. 4.0 cc SMA & sust.
Hiccups.

0815 hrs Put in incubator

0900-0930 Awake, looking up, head & chest raised on elbows, fists partially clenched. Grasped large & small surrogate mothers, crawled over to back. Fell behind and was unable to pull self up, but when righted, remained sitting up. Mouthed wooden edge of towel rack around which fur arranged, repeatedly and with vigor. Clamped fur with feet and [[?]] one hand. Efforts at trying to pull self up back side of surrogate mother appeared too much for muscle development, as yet. [[Trunk]] head or arms would tremble after each attempt. Moved around with upper part of body mostly erect for about 1/2 hr. Sometimes vocalized and opened mouth wide (gape?). Finally gave up and went to sleep on side. Note[[underlined Note]]: Since he was fed at 7:45 shouldn't have been hungry but acted that way. Scratched ^[[side]] with hind foot several times.

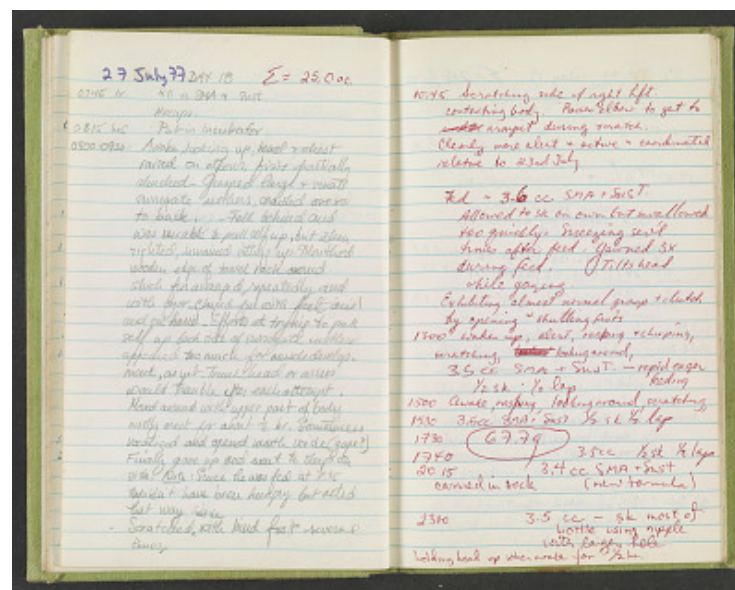

[[end page]]
[[start page]]

10:45 Scratching side w/ right [?]. contacting body. Raises elbow to get to ~~under~~ armpit during scratch. Clearly more alert & active & coordinated relative to 23rd July
Fed ~ 3.6cc SMA & SusT.
Allowed to sk[?] on own but swallowed too quickly. Sneezing sev'l times after feed. Yawned 3X during feed. Tilts head while gazing.
Exhibiting almost normal grasp & clutch by opening & shutting fists

1300 Wakes up, alert, rasping & chirping, scratching, ~~looked~~ looking around, 3.5 cc SMA & SusT. - rapid eager feeding
1/2 sk 1/2 lap

1500 Awake, rasping, looking around, scratching,

1530 3.5cc SMA & SusT 1/2 sk 1/2 lap

1730 67.7g[[circled in red]]

1740 [[circled in red]]3.5cc 1/2 sk 1/2 lap[[/circled in red]]

2015 3.4cc SMA & Sust
carried in sock (new formula)
2300 3.5cc - sk most of
bottle using nipple
with larger hole
holding head up when awake for 1/2 hr.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
