## **Devra Kleiman - Brazil field notes, February - March 1986**

Extracted on Apr-18-2024 01:02:08

**The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.**

The Smithsonian Institution (the "Smithsonian") provides the content on this website ([transcription.si.edu](https://transcription.si.edu)), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or [transcribe@si.edu](mailto:transcribe@si.edu)

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

almost every day - seeking each other out between 0900-1100 hours. Encounters involve lots of running but no serious aggression.

[[circled]] B [[/circled]] Copns:

No births except Maria; eldest of Wich group copulated with Lancelot & Prometheus of N.O. group.  
Jodie has copulated with her brothers, Juan & Pepe.

Limited copulatory activity in N.O. group.

[[circled]] C [[/circled]] Encounters & tree holes:  
Wichita uses only natural den holes now since their original box is inhabited by bees. (They have smoked out the bees several times.)  
Assistants don't know where they are sleeping since they get

to study area too late & leave too early.

Encounters are very ritualistic & similar to those of wild tamarins.

[[underlined]] Carlos group [[/underlined]]  
Laurenz recently trapped them. There are ~~two~~ <sup>at least 2</sup> litters [four young].  
Weights ~ 290, 290, 237, 270  
which don't correlate particularly well with body size. However, there are probably 2 litters of 2.

Laurenz also caught the 1, 1, 1 SA (from last year), and saw 4th animal. Missing were <sup>either</sup> the 2nd adult ~~and~~ <sup>or</sup> the 2nd ~~adult~~. Not clear whether latter had died, disappeared, or just temporarily missing, nor which animal was gone.

The untrapped animals apparently wanted to get to trapped young, so it may well

## Smithsonian Institution

*Smithsonian Institution Archives*

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
