Hudson River, New York City*

Applauding New York City's Fjord

New York City boast the most southerly fjord in the world, the Hudson
River. This dramatic waterway plays many versatile roles in New York
City's magnificent natural environment.

Glaciers gouged its valley to depths of nearly a thousand feet. Its tidal
currents carry salt water all the way to Albany, making it an estuary and
not a river.

Manufacturers Hanover sees the city in ways it has never been seen
before. That's why it is the bank for New Yorkers.
