Journal

[[wavy underlined]] Barro Colorado Island, Panamá [[/wavy underlined]]

13 January We were evil & slept late today. I tried going out in the afternoon to collect group composition data on the Shamon-Balboa loop. I found out that it's useless trying to study birds in the afternoon this late into the wet season. I didn't see much & got a lot of ticks. I did see a Pigmy Tyrant and white-tailed deer Yellow-backed orioles are running amok in the clearing.

14 January I did a plateau census in the morning & got so covered with ticks that I came back at 1:00. Ochre-bellied Flycatchers are back along Snyder-Molino. The winds came up this morning at around 8:30.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities.Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
