The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the following terms.

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. See this project and other collections in the Smithsonian Transcription Center.

layout permits a less linear, more conveniently clustered configuration of museum buildings to be planned, and the adjacency of an area for future development is another advantage for Dulles.

Financing and Infrastructure - While differing a great deal in detail, the two offers are roughly comparable with respect to financing and infrastructure support. Though it needs substantiation, Virginia's reference to "an appropriate level of support" for lease payments seems advantageous. In short, however, neither proposal for infrastructure and financing is clearly superior.

Demographics and Metropolitan Access - Projections for long-term future growth in passenger use at each airport and for the future development of the Washington-Baltimore metropolitan region adjacent to each airport become increasingly speculative over the period two decades or more hence when the NASM Extension will be fully developed. Well before that time, it can be taken for granted that rail access to Dulles Airport will have been introduced. It is also virtually certain that Dulles will continue to hold its place as the preferred international gateway to Washington.

Miscellaneous Offerings - Both states offer a variety of scholarly and aerospace networks which parallel connections the Museum has already established.

Implications of Choice for Further Progress on Project - The Smithsonian should move in a principled and orderly fashion toward termination of the decision-making process with regard to these two sites; it would be undesirable to imply openness to additional offers from further bidders, indefinitely lengthening and complicating the choice. It is vital to close off that possibility firmly and conclusively. A reaffirmation of the Dulles choice would seem to have this effect, while the BWI choice might well immediately invite the entry of additional competitors.

Correspondence and other expressions of interest recently received were noted. The Regents considered a generous proposal from the City of Denver to use a portion of the facilities at Stapleton Airport. It was clear in discussion that the proposal was viewed as too late to be comprehensively considered, that decision-making should not be delayed for such purposes, that claimed savings of \$100 million seemed unrealistic in view of questions about the suitability of the facilities for museum purposes, and that a major concentration of the National Air and Space Museum's collection at such distance would require an essentially autonomous museum with its own, somewhat duplicative staff.

It was also noted that Governor Schaefer, in his letter of January 24, offered to provide an additional \$10 million for the project at BWI. In discussion, it was pointed out that, while the Governor's action made the Maryland offer more attractive, the additional resources did not give BWI a decided advantage in terms of the projected completion of the project (total costs of which could be \$330 million) when compared with Virginia's unspecified offer to match funds appropriated by the Federal government.

lapout permits a less linear, more conveniently sbastered configurations of momens buildings to be planned, and the adjacency of an area for future development is sensitive advantage for bulker.

Financing and Infrastructure - While differing a great deal in detail, the two offers are troughly emparable with respect to financing and infrastructure separati. Though its masks substantiation, Virginia's reference to 'an appropriate level of support' for lease payments seems advantageous. In short, however, neither proposal for infrastructure and financing is clearly support.

Descriptions and Matropolitas Access - Trojections for leng-term future growth in parameters are deal atropot and for the famine development of the Washington-Walkington metropolitan region adjacent to each afroyoth because intermedingly speculative ever the period two decades or more hence when the MASK Extension will be fully developed. Well before that them, it can be taken for granted that radi access to Palles Atropot vill have been introdenes. It is also virtually vertice in balles will continue to hold the place as the preferred international gateway to Fushington.

Missellameous Offerings - Both states offer a variety of sebstarly and serospace networks which parallel connections the Massaa has already extablished.

implications of Gautas for Farders Progress on Project - The Santhanian shauld move in a principled and carterly fashing toward termination of the decision-making process with regard to these two sites: it would be undesirable to imply operases to additional effect free forther biolets, invisibility lengthening and couplisating the obsise. It is within the sleep off that preschilding finaly and consistively. A reaffirmation of the bulke claims would seem to have this effect, while the BNI choice might well immediately invite the entry of additional competitors.

Cartisgenshaps and other approxima of interest recently reserved were excisit. The Regerck searchers a generous proposal from the City of Dereve to use a partion of the facilities at Stapleton Alaport. It was clear in discussion that the proposal was viewed as too lace to be comprehendively considered, that desires-making should not be delayed for such purposes, that claims around on the facilities for means purposes, and that a agor constantion of the facilities for means purposes, and that a agor consentration of the facilities for means purposes, and that a agor distance would require an essentially surmanous means with its eve, neeebst deplicative staff.

It uss also rated that Enverone Tehesfer, in his letter of Jennary 3n, offered to provide as additional 300 millions for the project at BWL. In discussion, it was pointed our that, while the Governey's action made the Heryland affer more attractive, the additional resources did not give BWI a decided denoting in terms of the projected completion of the project local sense of which scale is \$100 million) when segments with Virginia's unspecified offers to match fault appropriated by the Meening presenter.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities.Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
