**The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.**

The Smithsonian Institution (the "Smithsonian") provides the content on this website ([transcription.si.edu](https://transcription.si.edu)), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or [transcribe@si.edu](mailto:transcribe@si.edu)

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

new world, and of this new world by the inhabitants of North America, primarily. The northern continent is gifted by nature to a greater extent than any other portion of the earth's surface. It is rich in coal and iron, while a very great percentage of its superficial area is potentially rich in agriculture, grazing lands and all necessary woods and metals. The southern continent not only is much smaller than its neighbor((neighbour)) to the north but is proportionately very poor in coal, iron, and agricultural spaces, while much is covered with mountains and vast wooded swamps. Today, the population of the whole of South America is barely one-half that of the United States alone. The North American continent can, without doubt, support no less than 800,000,000 people.

The rumblings of this coming strife have ceased to be inaudible whispers, but are the loud protests of the Japanese people, the vanguard of the Asiatic, over the exclusion laws, the land laws and their unequal treatment at the hands of our citizens ((citizens)). Sooner or later the diplomatic means of handling these questions will fail and a physical means of impressing our will on the hostile state will be the only recourse. In other words, war.

## Smithsonian Institution

*Smithsonian National Air and Space Museum Archives*

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
