Three things are necessary to the successful termination of a war. First, the destruction of the hostile armed forces; second, the destruction of the hostile power to make war; and, third, the destruction of the morale of the hostile population so that the war will not be renewed at an early date. None of these measures are possible of accomplishment by a passive defensive alone. The offensive must be assumed and maintained until a successful conclusion of the war is obtained. If this is not done and the power of initiative and offense is handed to the enemy, defeat will certainly be the result.

Before the European War of 1914-18 military power was reckoned in two terms only; those of land power and sea power. The theatre of operations or that part of the earth's surface to which the hostile land or sea forces were capable of engaging in combat, was restricted to an ocean or part of it, or, on the land, to a single frontier or one or more contiguous frontiers. The field of operations or the areas in which those land or sea forces came into hostile contact, consisted

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
