The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the National Museum of African American History and Culture as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the National Museum of African American History and Culture website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact National Museum of African American History and Culture or transcribe@si.edu

For more information on this project and related material, contact the National Museum of African American History and Culture. [See this project](#) and other collections in the Smithsonian Transcription Center.

If you're an engineer, your kids can brag about you that way. Because Hughes Space & Communications Group has immediate openings with long range growth opportunities. Our strong and consistent growth is demonstrated by our 1500 active projects companywide, and backlog of more than \$5 billion. And since more than 90% of our supervisory promotions are filled from within the company, you can expect professional growth to match your capabilities.

This is the acknowledged technological leader and we excel at the cutting edge of technology. One reason is that our proven management team has a philosophy of management by and for engineers. (More than 1/3 of our people are engineers and scientists.)

Hughes Space & Communications Group is now starting work on the Galileo/Jupiter Program which will give us a close-up look at the Solar System's largest planet in 1986. If working on this kind of project appeals to you, join the people who are working on them at Hughes today.

Application Software Development.

- ☐ Software Development (Fortran, Compass, Macro 11)
- ☐ Top-Down Structured Software Design and Programming

DP Systems Engineering and Analysis.

- ☐ Software Requirements Engineering
- ☐ Resource Requirements Analysis
- ☐ Software Design

DP Systems Integration, Test and Evaluation.

- ☐ Test/Evaluation across DP life cycle
- ☐ Programming/Checkout of Test Driver Software
- ☐ DP Software and Hardware Testing

Communication Systems and Components.

- ☐ RF Circuit Design and Development
- ☐ Solid-State Transmitter and Receiver Design
- ☐ Power Supply Design, Lo and Hi Voltage.
- ☐ RF Packaging and Product Design

Microwave Systems, Antennas and Components.

- ☐ Antenna Design and Fabrication
- ☐ Microwave Circuits, Filters, Solid-State Design and Development
- ☐ Spacecraft Communications Receiver Engineering

Digital Communications and Control Systems.

- ☐ Telemetry and Command Analog/Digital Circuit Design
- ☐ Advanced LSI Custom SOS/CMOS Design
- ☐ Test Equipment and Packaging Design

Power Systems.

- ☐ Circuit Design
- ☐ Battery Design and Test
- ☐ Power Systems Supervisor
- ☐ Solar Panel Design and Test

Smithsonian Institution

National Museum of African American History and Culture

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
