The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the National Museum of African American History and Culture as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the National Museum of African American History and Culture website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact National Museum of African American History and Culture or transcribe@si.edu

For more information on this project and related material, contact the National Museum of African American History and Culture. [See this project](#) and other collections in the Smithsonian Transcription Center.

Ernest Crichlow, artist for the Exceptional Black Scientists Posters, (left) and Dr. David Blackwell, who was honored in the 1983 series, autograph posters as Jerry Campbell, Thelma Perkins and Dorothy Arnette of CIBA-GEIGY look on.

Exceptional Black Scientists

Several individuals honored in the series have taken part in educational functions. For example, Dr. Patrick spoke at a forum on "Minorities in the High Technology Workplace" during the National Urban League's 1983 convention in New Orleans.

A few weeks earlier in New Orleans, Dr. David Blackwell, professor of statistics at the University of California at Berkeley, participated in the educational task force and was a judge and presenter of the ACT-SO awards in mathematics to high school students at the NAACP convention. Dr. Blackwell is honored in the 1983 series.

As part of the program, CIBA-GEIGY has presented original poster artwork to a number of educational and scientific institutions. For example, original portraits, which were done by noted artist and illustrator Ernest Crichlow, have been given to the Massachusetts Institute of Technology, the National Institutes of Health and the University of California at Los Angeles. Additional presentations are planned for 1984.

Since 1980, CIBA-GEIGY has distributed more than 160,000 copies of the posters to schools, libraries, community organizations, civic groups and individuals across the United States and even overseas.

Through the posters, thousands of people are learning about the important contributions in science, medicine, mathematics and education of these 15 outstanding individuals.

Smithsonian Institution

National Museum of African American History and Culture

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
