The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

Aviation Advance Revealed at Show

New York-(AP)- Aviation's business men and scientists examined yesterday the newest developments in the flying industry as the groups gathered here for their annual winter sessions.

At Columbia University the scientists listened, under the aegis of the Institute of Aeronautical Sciences, to the men from the laboratories and classrooms describe their developing theories of flight.

In Grand Central Palace the National Aviation Show opened last night with the first indoor exhibition of planes Gotham has seen in seven years.

As the 32 planes in the show— ranging from "hedge hoppers" that run slightly over the \$1,000 price mark to the bigger transports— were readied for the public showing, members of the Aeronautical Chamber of Commerce of America heard a report that 1936 business was up 85 per cent over 1935.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
