Smithsonian National Air and Space Museum Archives

Knabenshue Collection - National Park Service

Extracted on Apr-16-2024 12:12:16

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

DEVELOPED AREAS

DRAWINGS

UTILITY LAYOUT PLANS

Utility Layout Plans are prepared by the Branch of Engineering to supplement the Developed Area Plans. They should record in detail the kind and location of all existing and proposed utilities necessary to the operation and development of the area.

The Utility Layout Plans are made at the scale of their corresponding Developed Area Plans and should show all building, road and trail layouts. When the quantity of utility data to be shown is not large a separate plan is not required; in such cases the data may be placed on the Developed Area Plan provided legibility is not sacrificed.

Where the locations of the sources of water and power supply or of sewage disposal fall beyond the limits of the drawing, proper explanatory notations or small scale insert maps should be included.

Standard Symbols are used to indicate in detail the LAYOUTS and APPURTENANCES of the following:

The Water System
Including location of source of supply and storage facilities.

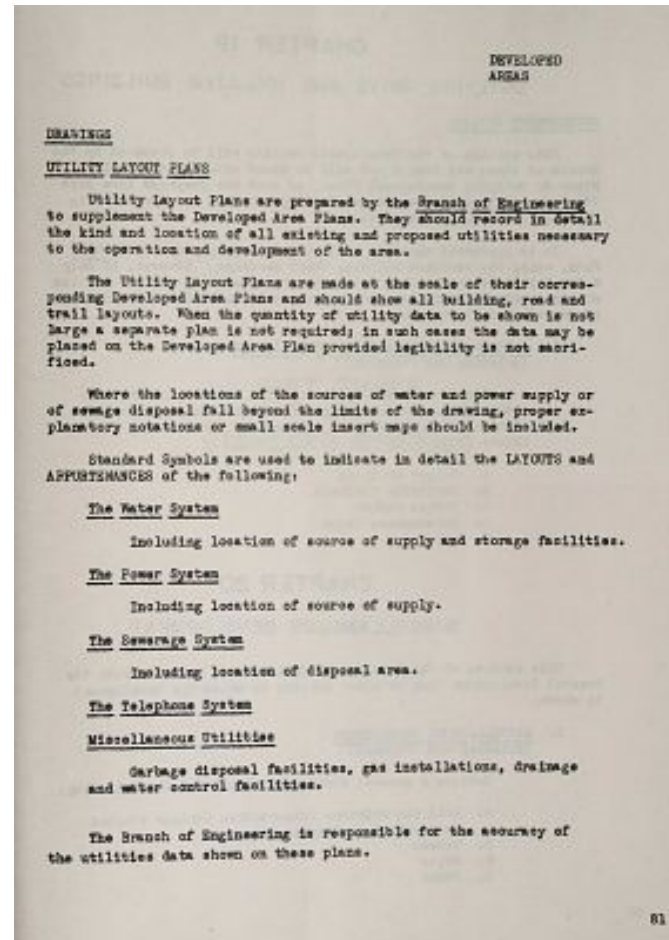

The Power System
Including location of source of supply.

The Sewerage System
Including location of disposal area.

The Telephone System

Miscellaneous Utilities
Garbage disposal facilities, gas installations, drainage and water control facilities.

The Branch of Engineering is responsible for the accuracy of the utilities data shown on these plans.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
