REPUBLIC AVIATION

REPUBLIC AVIATION REVIEW
Published by
REPUBLIC AVIATION CORPORATION
(Former name: Seversky Aircraft Corporation)
EXPORT DEPARTMENT
H. W. Flickinger, Director
Donald M. Parker, Assistant
Farmingdale, Long Island, New York, U. S. A.
Cable Address: Repubav, Farmingdale, N. Y.
Copyright 1940 Republic Aviation Corp.

[[image]]
Old timers by now, at the Republic Aviation plant are Lieut. Bengt Wassgren (left) and Lieut. Eric Lindquist, members of the Swedish Control Commission who have been stationed at the Farmingdale plant for many months. They are standing by a new Swedish fighter (above).

They built it, she flew it (below). Three Republic executives, (l. to r.), Vice President Joseph L. McClane, President Wallace Kellett and Military Contracts Director C. Hart Miller, are grouped around comely Miss Jacqueline Cochran who flew a Republic plane to several new speed records recently. The plane and the Republic plant loom behind the group.

[[image]]

ELWOOD H. HERBIG Executive Engineer of Republic Aviation Corporation and an early associate of Orville Wright, died at his home in Great Neck, New York, on May 4th, after an extended illness. Mr. Herbig's career had been a distinguished one and included executive service with the Dayton-Wright Companies, Chance-Vought Corporation and other important aircraft companies. He will be sorely missed as one of the most respected and valued members of the Republic organization.

[[image]]
Foreign missions visit Farmingdale. Shown above with Republic officials are the members of the Iran mission on a recent visit to Republic Aviation Corporation's plant in Farmingdale. Republic's busy plant has been a mecca for foreign purchasing groups within recent months and many visiting military experts have placed the stamp of their approval on Republic designs. These visitors have seen planes rolling to the delivery floor at the rate of one per day, and were given an opportunity to fly or observe the flight characteristics of standard Republic types.

[[image]]
Republic's President W. Wallace Kellett, wartime pilot, air transport veteran and successful manufacturer, had guided the Corporation to its present high place in the American aircraft industry.

FIRST? To insure the protection of the eyes of its 1600 employees in the manufacturing department of the plant, Republic Aviation Corporation has purchased individual pairs of goggles for every man on the hourly payroll. It is believed that we are the first aircraft company to take this safety precaution!

REPUBLIC DEMONSTRATOR AVAILABLE
Republic Aviation Corporation has secured a recently designed standard low demonstration to representatives of foreign governments. Flightless to be accepted by request and upon the approval of the proper United States authorities. The famous Republic fighter used by Miss Jacqueline Cochran this year also is currently available for demonstration. The Republic fighter division is represented by George Bennett (below), well-known test pilot.

Wallace Kellett President of the Republic Aviation plant in Farmingdale, New York, recently attended the 10th Annual Meeting of the National Association of Manufacturers. His job will be to represent the construction of Republic's large orders for the United States War Department.

REPUBLIC IS READY

REPUBLIC DEMONSTRATOR AVAILABLE

Republic Aviation Corporation has reserved a recently designed airplane for demonstration to representatives of foreign governments. Flights can be arranged by request and upon the approval of the proper United States Authorities. The famous Republic fighter used by Miss Jacqueline Cochran this year also is currently available for demonstrations. The Republic flight division is supervised by George Burrell (below), well-known test pilot.

Smithsonian National Air and Space Museum Archives

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
