## [[stamped]] FLYING PIONEERS BIOGRAPHIES OF HAROLD E. MOREHOUSE [[/stamped]]

even carried passengers. This biplane of 30 foot span was complete in every way, tricycle gear, seat and standard controls. and weighed as a glider, less engine, about 350 pounds.

About this time the Cannon brothers became active in the newly formed Aero Club of California which made its headquarters at the Los Angeles Motordrome. The Aero Club held picnics and small aero meets several times that summer, and Jack would always make some towed flights at these events. On October 22d and 23d, 1910 the Club held a more ambitious all-novice flying meet and there Cannon put on quite a show of good towed flying. First in the air to open the meet, he made a number of complete circles around the field as well as straightaway flights towed by a Stoddard-Dayton ear, and clearly demonstrated his ability to repeatedly take off and land, as well as having good control in flight. At that time they were making plans to install a converted Ford Model "T" automobile engine in this plane. His repeated good work there was easily one of the highlights of the event and he was given a prize for his efforts. During this period he was regularly employed in gas engineering and was rapidly becoming quite an authority in that field.

Cannon did install the Ford automobile engine in his plane and succeeded in flying well with it. He entered this plane in the amateur events at the second Los Angeles Aviation Meet at Dominguez Field, held December 24th, 1910 to January 2d, 1911. This was a large international affair with several of the world's lead-ing aviators competing. In the Curtiss Team were Curtiss, Willard, Beachey and Ely. The Wright Team was comprised of Brookins, Hoxsey and Parmelee. James Radley was there from Great Britain and Hubert Latham from France. Those in the novice class were Cannon, Roehrig, Stites, H. Beachey, Martin, Cooke, Robinson, Day and Slavin. At this great event Cannon did some very good flying with his Ford-Powered homemade plane, and after the show was judged one of the best amateurs in the Los Angeles area. This was stated to be the result of much hard work and experimenting which showed up well in the contest.

Following the meet Cannon announced that he and his brother were working on a

even servied passengers. This biplians of 30 foot span was complete in every way, trityple goar, seat and standard controls, and weighed as a glidar, lass engine, about 350 pounds.

About this time the Common brothers became active in the newly formed Aero Clab of Galifornia which made its headquarters at the Los Angeles Noterirans. The Aero Clab held pionics and small mayo neets several times that easser, and fask would always make some towed flights at those events. On Ortsber 22d and 23d, 1910 the Clab held a more ashitions all-sowine flying meet and there Common put on quite a show of good towed flying. First in the sir to open the meet, he made a number of complete circles around the field so well so straightency flights towed by a Stoddard-Dayton car, and alensly demonstrated his shillity to repostedly take off and land, so well so beying good control in flight. At that time they were making plans to install a sonverted Ford Nodel "T" automobile engine in this plans. His repeated good work there was easily one of the highlights of the event and he was given a prime for his efforts. Furing this period he was regularly employed in gas engineering and was rapidly becoming quite an enthority in that field.

Owner did install the Ford automobile engine in his place and exceeded in flying well with it. He entered this place in the autour events at the second los Angeles Aristics that at Desingues Field, held December 24th, 1710 to Annuary 2d, 1911. This was a large international affair with several of the world's leading eviators competing. In the Curties Team were Curties, Willard, Beacher and Elly. The Fright Team was comprised of Brookins, Nameny and Furneles. James Rolley was there from Great Britain and Rebert Letters from France. Those in the norder class were Currons, Rechrig, Stites, H. Beachey, Hartin, Cooke, Hobinson, Bay and Slevin. At this great event Curron did some very good flying with his Ford-Powered homesude place, and after the slev was judged one of the best anatours in the los ingains area. This was stated to be the result of much hard work and experimenting which showed up wall in the contest.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
