[stamp on left margin] FROM THE FLYING PIONEERS BIOGRAPHIES OF HAROLD E. MOREHOUSE

The Wrights had decided to go into the exhibition business and were adding to their group of student aviators to form a team for this work, and Coffyn became a member of the first class at the newly established Wright Flying School at Simms Station about June 1st, 1910. Orville Wright had just completed the training of Al Welsh and was teaching Duval LaChapelle. Walter Brookins and Arch Hoxsey had returned from the earlier school at Montgomery, Alabama a short time before, so Brookins took over as instructor and, assisted by Al Welsh, completed the training of Hoxsey and LaChapelle, then immediately started teaching Coffyn and Ralph Johnstone.

A very rush training program was carried on during the first ten days of June and over 160 instruction flights were made, as the first exhibition engagement of the new student group was to be held at the Indianapolis Motor Speedway on June 13th to 18th, and every one was having to hustle to be as ready as possible for the event. The Wright Company had five planes at the Speedway meet, and Brookins, Hoxsey, Welsh, Johnstone, LaChapelle and Coffyn all made flights and put on a very successful showing. Oddly enough, Coffyn actually made his first flight alone during the meet. His training had not reached the stage where he had soloed but there, with continued assurances from the Wrights, he was coaxed to try it. Scared stiff in the presence of an immense crowd, with Wilbur Wright running along to steady a wing tip, he took off, made a short flight and a successful landing. Other short flights followed and he made his start as an aviator at that event. Over sixty flights were made during the meet without accidents. Orville Wright made several flights carrying distinguished passengers.

On June 28th to July 5th Coffyn was at an Air Meet at Montreal, Canada with Brookins, LaChapelle, McCurdy and DeLesseps. Here Coffyn first rode with Brookins as a passenger, then later again made a few short flights. At this time he was a combined mechanic and student aviator, still receiving instruction from Brookins at the first few exhibition engagements. From Montreal Coffyn and Brookins went immediately to Atlantic City, New Jersey where Brookins flew until July 12th. Coffyn helped assemble the plane, rode with Brookins and again made

The brights had decided to go into the condition humbrass and wave adding to their group of student amistors to form a toom for this work, and Coffyn became a number of the first class at the newly established Wright Plying School at Hama Station about Jess lat, 1910. Openlie Wright had just completed the training of Al Halah and was beauting Daval LeChapelle. Maker Brookins and Arch Hamay had returned from the sarlier school at Hostgowary, Alabass a short time before, so Brookins toom over as instructor and, senisted by Al Welsh, completed the training of Homey and LeChapelle, then issuedictely started teaching Coffyn and Halph Johnstone.

A wary ruch training program was carried on during the first ten days of June and over 160 instruction flights were ande, as the first enhibition engagement of the new statent group was to be held at the Indianapolic Neter Specimary on June 19th to 19th, and every one was having to huntle to be as mady as possible for the event. The Stight Company had five planes at the Specimar meet, and Brooklas, Nessey, Walsh, Johnstone, Indhapelle and Coffyn all note flights and put on a wary ememenful showing. Oddly enough, Coffyn actually made his first flight alone during the meet. His training had not received the stage where he had solved but hivee, with continued assumement from the Spidte, he was escoud to try it. Scared stiff in the presence of an immune crowd, with Wilber Spight receiving along to steady a wing tip, he took off, made a short flight and a successful landing. Other short flights followed and he node his start as an evision at their event. Over sixty flights were sade during the meet without acci-

On June 28th to July 5th Coffyn was at an Air Veet of Nortreal, Canada with Brookins, laGrapelle, Noturnly and Delessape. Here Coffyn first rode with Brookins as a passenger, then later again unis a few short flights. At this time he was a combined contacts and statest eviator, still receiving instruction from Brookins at the first few combition organizate. From Nortreal Coffyn and Brookins want immediately to Atlantic City, New Jersey where Brookins flow until July 12th. Coffyn helped assemble the place, rode with Brookins and again made

desta. Crville Tright nade soveral flights sarrying distinguished passengers.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
