The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

Eells returned to the state of New York where he became a machinist and tool maker for the American Can Company of Geneva, New York. During this time he owned and flew an Aeronca lightplane for sport. Upon retirement he moved to Florida and settled at Tavaris where he continued to do neighborhood repair work at times and enjoyed fishing. After gradually failing health, Eells passed away at the Waterman Memorial Hospital, Eustis, Florida, on November 6, 1965, at age 78. He was survived by a sister and a niece, both of Hammondsport, New York. His remains were returned to Bath for burial in Nondaga Cemetery. Fred G. Eells was one of the more capable pioneers of American aviation history. A good mechanic, he built his first planes and taught himself to fly them. One of the first to join the aviation movement in the United States, a close lifetime friend of Glenn Curtiss, he was the first to fly over Bath and Rochester, New York. He was continually striving to improve aircraft in every way possible. His name must be well recorded in the annals of early American aviation history.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
