with Glenn Martin through part of 1912 managing Martin, Blanche Scott and others.

When Roy left Glenn Martin he devoted full time to the compilation of the new airship. It was the largest dirigible made in the United States up until that time, being 50 feet long, 30 feet diameter and powered a 40 H.P. Hansen engine driving two propellers. It had a long all-aluminum fuselage-like car underneath and an entirely new method of fore-and-aft control by placing movable surfaces both front and rear which were interconnected, and proved very effective.

In February, 1913 permission was obtained from the Pasadena city government to rent ten acres of land and erect a hangar. Roy and Brookins made the first flight with the new ship on May 3rd and were very pleased with the performance. Tests continued through May 20th and they planned to start their airline soon. Through the balance of the 1913 season several hundred passengers were carried and many special trips were made with groups that wanted to see specific places from the air. By the end of the year they had established an unprecedented record of safe airship passenger operations and eastern aviation leaders were interested.

In January, 1914 Roy and his airship were featured in a new Universal movie, "The Flight of Life" at Pasadena. On March 6th wireless messages were sent between their airship in flight at Pasadena and the Government Station at San Pedro, 40 miles away. Passenger carrying was continued in California until about May 1st when the dirigible was taken to the White City Amusement Park in Chicago, Illinois for an 8-week engagement. There Roy carried passengers and made several trips over the city and Lake Michigan with the city dignitaries. Some good movies were made of his flights over Chicago.
