Scott Martin biplane.

Masson remained there over the winter of 1912-1913, then in the early spring of 1913 Martin sold a 75 H.P. Curtiss-motored Martin biplane to the Mexican rebel forces under General Obregon and Masson was hired to pilot the plane, with Thomas J. Dean as his mechanic. Their operations were established at Morenos Camo, Sonora, Mexico and an old Pullman car was provided for their living quarters. It was divided into a sleeping section, a dining area and kitchen with an ice refrigerator. Masson began flying there in May, first dropping propaganda leaflets over the enemy areas, then he and Dean began to drop bombs, which were made of 3 inch iron pipe, 18 inches long, packed with dynamite. Numerous bombing flights were made but with questionable results. There were delays at times waiting for repairs parts from Los Angeles.

On August 4th the two men resigned and returned to the United States. Immediately after this Masson sailed for France to join the war effort of World War I. He was first a flying instructor at Issoudun, then later was transferred to the famed Lafayette Escadrille as a fighter pilot. After the War Masson returned to the United States and engaged in various enterprises until 1928 when he became Field Manager for Pan American Airways at Belize, British Honduras.

In 1935 he was appointed French Consul at Belize where he remained until he resigned his post in 1940. At that time he moved to Chetumal, Mexico to become manager of the Hotel Iris, where he passed away on June 2d, 1950 following a short illness, at age 64. He was survived by his wife and a son.

Flying Pioneer Didier Masson, although foreign born, became very much a part of the early aviation era in the United States. Well known and an expert pilot, he contributed much to our early aviation progress and history.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
