**The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.**

The Smithsonian Institution (the "Smithsonian") provides the content on this website ([transcription.si.edu](https://transcription.si.edu)), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or [transcribe@si.edu](mailto:transcribe@si.edu)

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

On January 1, 1938, Musick and his crew of six were killed while on a survey trip near the Samoa Islands in the Pacific. Flying the "Samoa Clipper" they evidently got into some kind of extreme flight emergency and were dumping fuel. The trailing fuel stream was ignited in some manner resulting in a terrific air explosion and fire causing the loss of the plane and the crew.

New Zealand established Musick Memorial in 1941 and there were Memorial Plaques and Medallions following his death. He was a member of the Early Birds.

Flying Pioneer Captain Edwin C. Musick was truly one of the immortals of Pan American's vast airline system. Master air mariner, expert pilot of large clipper type aircraft, he was always studying to improve his knowledge and was taking special courses at the time of his death.

The world air travel facilities so universally accepted as a matter of course today are largely due to the faith and pioneering efforts of such men as Captain Musick who so richly deserve everlasting public gratitude.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
