WILLIAM E. SOMERVILLE Early Illinois Aviator - Engineer - Plane Builder

[[image]]

William E. Somerville was born at Harthill, Lanarkshire, Scotland, April 12, 1870. After attending grade school he continued his education in engineering at Glasgow Technical College. He left College in 1888 and started working as an apprentice at the Clyde Shipyards until he learned his trade as an electrician and marine engineer. When this was completed he shipped out as an electrician on the first electrically lighted liner that left Glasgow for Hamburg, Germany.

In 1892 he shipped from Glasgow to the United States as Chief Engineer on the Anchor Line, and after arriving here decided to stay. New York did not appeal to him so he went to Philadelphia where he read the "Help Wanted" ads and found the renowned Biddle family wanted an engineer for their yacht. Somerville applied for the job and was with them for the summer season. He then left on a free-lancing tour of the United States and Canada, during which time he took such varying jobs as a mining engineer, mechanic, electrical worker, and even a short hitch in the United States Army. Then he obtained employment with General Electric and traveled extensively for them as an electrician.

In 1895 he went to Coal City, Illinois to attend the funeral of his brother who had lost his life there in a mining accident. Somerville had no intention

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
