Sally K. Ride Papers - Ride's Shuttle Training Notes (starting 11/1981)

Extracted on Apr-16-2024 03:02:29

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

--> Ku band on STS-7: 1st flight with satellite....INCO's want to start talking about procedures & tests

REF data - if no # appears in C/W limits, it's inhibited or set off-scale high. [H2O loop CAB HX IN T is listed as inhbut S/W has a number I-loaded....ground inhibits it with a TMBU pre-launch]

PLBD (with Blalock)- actuator & latch gang being replaced (damage occurred before torque limiting).

·PTC closing (de-orbit day) produced worst overlap-adding DTO to get theodolite readings after 10 hrs of PTC (that will be 3rd FTO closing).

·no theodolite req'd on FD 1....since latch gangs are being replaced, they will cycle those latches (& flight tech wants doors cycled also)

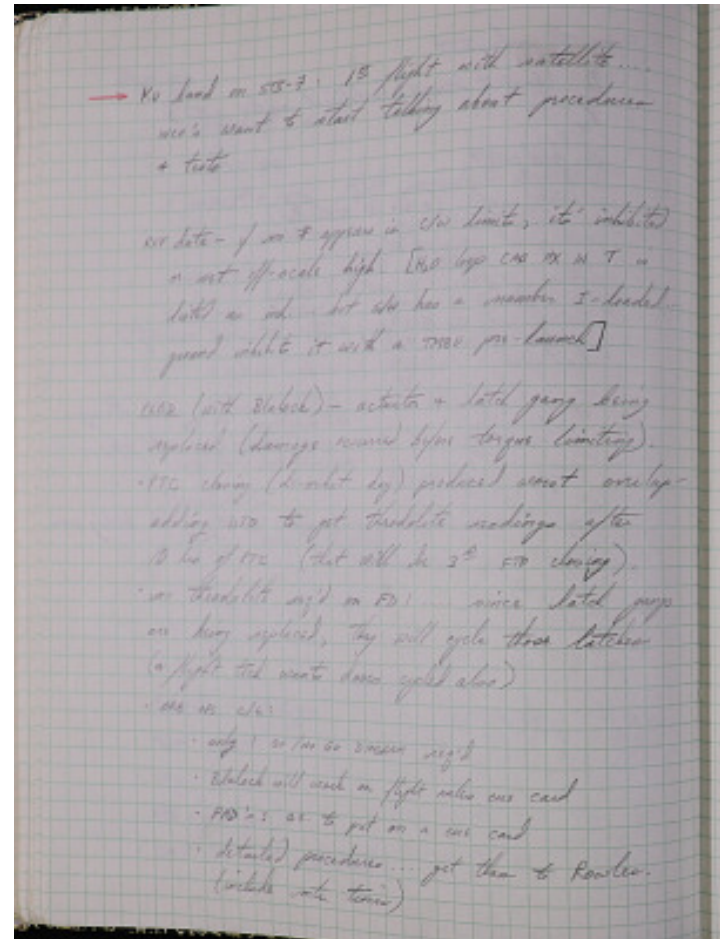

·ORB OPS C/L:

·only 1 GO/NO GO DIAGRAM req'd

·Blalock will work on flight rules cue card

·PAD's: o.k. to put on a cue card

·detailed procedures....get them to Rowles (include mtr times)

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
