portion of the results of Prof. Verrill's studies on the Echinoderms and Anthozoa, and of those of Prof. S. I. Smith on the Crustacea, made at New Haven during the year. The collection of deep sea barnacles stored at New Haven has also been turned over to the Museum by Prof. Smith for transmission to Dr. P.P.C. Hoek, of Leiden, a competent authority, who has offered to examine and report upon this group.

Several smaller collections were sent in by or through the Fish Commission as follows: Specimens of various kinds obtained at the mouth of St. Mary's river, Fla., in March, by the steamer Fish Hawk; Crustaceans and Radiates collected by Dr. T. H. Bean, at Fire Island Beach and Patchogue, Long Island, during the summer; numerous Crustaceans from Mr. E. G. Blackford of New York; specimen of crustacean fish parasites from Vineyard Sound, Mass., and of rare crustaceans obtained

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
