Stoughton February 26th 1932

Dear Doris

This is a dark cloudy day, all snow is about gone it dissapeared [[disappeared]] shortly after noon, the temperature went up to 58 I received your bundle this forenoon, there will be some more wear in the shirt. I have already got it mended. & the sleeves tucked up. The aprons will add to my stock I already have on hand. Pa is fasting its most time though for his appetite to get the best of him towards night it often does & then he eats.

Pa says no Erring for him, if I should have him come in the state he now is in, looking & watching for them to come and get him he would have a fit. & be worse than he is, it may be just as well to wait till he is a good deal more in need of a doctor. he is growing obstinate every day, hard to get him to do anything one wants him to do, very freaky also. I guess Talbot saw how he had changed. as to his ankle it does not look very much different than it did a month ago. Pa is very much for investigating every thing I do & it does get on ones nerves he is so suspicious of every thing.

I have just been down to the little store for a few thing to go me over the weekend & it seemed good to get out once more. a lot of water stands on the top of the

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
