Project PHaEDRA - Williamina P. Fleming - Variable Stars #1

Extracted on Oct-01-2022 07:55:08

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

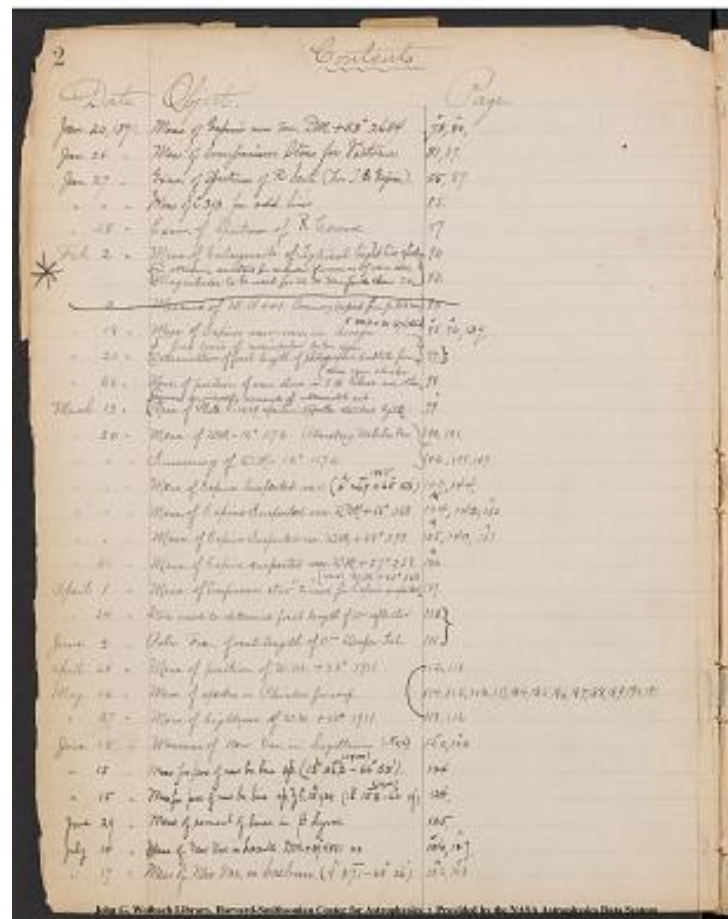

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Harvard-Smithsonian Center for Astrophysics as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Harvard-Smithsonian Center for Astrophysics website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Harvard-Smithsonian Center for Astrophysics or transcribe@si.edu

For more information on this project and related material, contact the Harvard-Smithsonian Center for Astrophysics. [See this project](#) and other collections in the Smithsonian Transcription Center.

Contents

Date	Object	Page
Jan. 20, 1891	Meas. of Espin's new var. DM.+53° 2684	78,80,
Jan. 24, 1891	Meas. of Comparison Stars for Victoria	81,89
Jan. 27, 1891	Exam. of Spectrum of R Scuti. (For J.E. Espin.)	85,87
Jan. 27, 1891	Meas. of C398 for add. lines	85.
Jan. 28, 1891	Exam. of Spectrum of R Coronae	87
Feb. 2, 1891	Meas. of Enlargements of Typical bright line spectra	90
*	Magnitudes to be used for 20 DM stars fainter than 7.0 in obtaining constant for reduction of measures of var. stars.	92
Feb. 3, 1891	Measure of M.P.441 Summary (copied from p.318)	93
Feb. 18, 1891	Meas. of Espin's new var. in Auriga 5326 +31 57 (1855)	95,96,139
Feb. 20, 1891	Determination of focal length of photographic doublets from four pairs of circumpolar polar stars	97
Feb. 26, 1891	Meas. of position of var. stars in 5M Librae and other star near cluster	98
March 13 1891	Meas. of Plate C.1269 spectrum opposite standard light square to identify measures of ultraviolet end.	99
March 30 1891	Meas. of DM -12° 1172 Planetary Nebula New	100,101
March 30 1891	Summary of DM -12° 1172	102,108,109
March 30 1891	Meas. of Espin's suspected var. (4h 26.9m +65° 53' 1855)	103,104
March 30 1891	Meas. of Espin's suspected var. DM +68° 368	104,142,150
March 30 1891	Meas. of Espin's suspected var. DM +68° 398	105,140,151
March 31 1891	Meas. of Espin's suspected var. DM +57° 258	106
April 1 1891	Meas. of comparison star "C" used for Espin's suspected var. DM +68° 368	107
April 24 1891	Star used to determine focal length of 15in reflector	110
June 3 1891	[[Pobs Frec?]] focal length of 11in Draper Tel.	111
April 28 1891	Meas. of position of DM +33° 1911	112,118
May 12 1891	Meas. of spectra in Pleiades for comp.	114,115,116,117,184,185,186,187,18,189,190,191
May 27 1891	Meas. of brightness of DM +33° 1911 (arrow pointing towards '112, 118' two lines above)	118,112
June 15 1891	Measures of new var. in Sagittarius (No.2)	120,123
June 15 1891	Meas. for pos. of new br. line sp. (13h 36.3m -66° 55' 1900)	124
June 15 1891	Meas. for pos. of new br. line sp. Z.C.15h 934 (15h 15.8m -62° 19' 1900)	124,
June 29 1891	Meas. of reversal of lines in beta Lyrae	125
July 14 1891	Meas. of New Var. in Lacerta. DM +39° 4851	22 126,127
July 17 1891	Meas. of New Var. in Caelum. (4h 37.1m -38° 26')	152,153

Smithsonian Institution

Harvard-Smithsonian Center for Astrophysics

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
