The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

A Century of Progress In Aviation

The announcement of A Century of Progress and its dedication to the celebration of progress of man achieved through science, had hardly been made when the achievements of modern man in his conquest of the air proclaimed to the world a new era of advancement. The successive records of spectacular speed made month by month by leather armored knights of the air fill the beholder with amazement and open to the world the prospect of continuing progress. The classic Round Table of King Arthur boasted no nobler group of adventurous spirits than those whose courage and daring and outstanding achievements have made as household words, the names of Balbo, Post, Mattern, Codos and Rossi, Stephen and Darius, James and Amy Mollison, Settle, and many more

The International Air Races and the Gordon Bennett Balloon Race as the official competitive aeronautical event of A Century of Progress serves a dual purpose. It is an exhibition of man's progress in the air since the time, one hundred and fifty years ago, when Stephen and Joseph Montgolfier made the first flight in a hydrogen filled balloon, and in illustrating improvements which are almost monthly being brought into use, it points the way to further progress in aviation in the century to come.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
