The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

REGIONAL MEETINGS

A technical meeting was held on October 26, 1955 by the Society at Arlington State College in Arlington, Texas, under the auspices of the SOUTHWESTERN Region. Robert L. Lichten, Chief Experimental Project Engineer, Bell Aircraft Corp., repeated his paper given at the recent West Coast Forum, entitled "Performance Requirements for Transport Rotorcraft."

On November 1st a joint meeting of the MID-EASTERN region of the Society and the PHILADELPHIA section of the ASME was held in the Drexel Institute of Technology, preceded by a dinner at the Lido Cocktail Lounge in Philadelphia. Subject of this meeting was "Vertical Lift Aircraft" and the guest speaker was Kenneth B. Gilmore, Chief Design Engineer, Piasecki Helicopter Corp.

Also on November 1st, Edward F. Katzenberger, Chief of General Design at Sikorsky Aircraft spoke to the HAMPTON ROADS section on the subject of "Progress and Problems in Helicopter Transport Design." This meeting was held at the Fort Monroe Officers Club, Fort Monroe, Va.

ROSTER ERROR

In printing the annual ROSTER of the Society, it has been brought to the attention of the home office that the list of regional officers of the Society on page 6 is in error, in that officers of the Fort Eustis section were listed as being regional officers in the Southeastern region.

We should have stated as follows: Southeastern Regional Vice President- Major General Frank A. Helleman, USA (Ret.), regional Secretary-Treasurer- Miss Marie Sayman. The officers of the Fort Eustis section are as follows: Chairman- Richard C. Dingledein, Treasurer- Raymond L. Chaney, Corresponding Secretary- William B. Tinsley.

The home office has received letters from members stating that they cannot understand why their names were not included in this year's ROSTER. Unfortunately, since this was our first edition, we had nothing to fall back on outside of a constantly changing membership list, and for this reason we elected to send out ROSTER cards to each member. We asked that the membership return these cards to us by July 31st, including the necessary information for the ROSTER. Due to the press of other business, certain members were not able to accomplish this in time and since we did not feel that we had sufficiently current information on them, we did not include their names in this year's ROSTER.

WE ARE SORRY BUT

Your editor regrets that due to a time-log-jam in the home office this past month, due to the activities surrounding the Western Forum, it will be necessary to omit the OCTOBER issue as such. For this reason we are

Smithsonian Institution

Smithsonian National Air and Space Museum Archives

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
