(5-31-61)

## FOR IMMEDIATE RELEASE

More power per pound of engine than any other production turboshaft is produced by General Electric's CT58 gas turbine which powers San Francisco & Oakland Helicopter Airlines' new Sikorsky S-62 turbocopter.

Two of the same 1000 horsepower engines, weighing only 299 pounds each, two weeks ago powered a Navy HSS-2 turbocopter to a new world's speed record of over 190 miles per hour.

Smithsonian National Air and Space Museum Archives

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities.Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
