The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

INFECTION: SYSTEMIC, LOCAL AND IMMUNITY

Session Chairman: Curtis P. Artz
Medical College of South Carolina
Charleston, S. C.

2:00 P.M.-

"The Role of Bacteria in Burn Mortality" - K. Markley, National Institutes of Health, Bethesda, Md.

"Bacteriostatic Effect of Silver Nitrate on the Burn Wound" - William W. Monafa, Washington University, St. Louis, Mo., and Carl A. Moyers, Michigan Technological University, Houghton, Mich.

"Results of the Treatment of Burns with Silver Nitrate" - Sidney E. Ziffren, University of Iowa, Iowa City, Iowa.

"Control of Experimental and Clinical Burn Wound Sepsis by Topical Application of Sulfamylon Compounds" - R. B. Lindberg, J. A. Moncrief and A. D. Mason, Jr., U. S. Army Surgical Research Unit, Fort Sam Houston, Tex.

"Comparative Clinical Study of Local Burn Wound Therapy" - R. B. Berggren, Ohio State University Hospital, Columbus, Ohio.

"Comparative Studies of Topical Silver Nitrate, Sulfamylon and Gentamycin" - Bruce MacMillan and William Altemeier, University of Cincinnati Medical College, Cincinnati, Ohio.

"Early Excision and Synthetic Skin in the Experimental Control of Burn Wound Sepsis" - Discussant: Donald P. Dressler, Tufts University, Boston, Mass.

"Resistance to Infection in Burned Patients" - Henry H. Balch, Georgetown University, Washington, D.C.

"Alterations in Immunological Responsiveness Associated with Severe Thermal Injury" - Felix T. Rapaport, P.R. Casson and John Marquis Converse, New York University School of Medicine, New York, N.Y.

Smithsonian National Air and Space Museum Archives

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
