Captain Michael Gitt Papers - War Department, TM 1-900, Technical Manual, Mathematics for Air Crew Trainees, 2/26/1943

Extracted on Apr-23-2024 03:42:06

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

1-4 ARMY AIR FORCES

d. Undoubtedly, some of the topics will seem elementary to many of the students. It must be remembered, however, that the mathematical proficiency demanded of an airman not only involves an understanding of the various operations, but also the ability to perform these operations accurately and quickly, and often under trying circumstances. Therefore, the time spent in practicing such a simple operation as addition, for example, will give valuable training, no matter how clearly the process is understood.

2. Materials, - In addition to pencil and paper, the student will need a ruler, a protractor, and a few sheets of graph paper.

SECTION II

FUNDAMENTAL OPERATIONS

	Paragraph	
Purpose and scope	3	
Addition	4	
Subtraction	5	
Multiplication	6	
Division	7	
Conversion of decimal fractions to common fractions	8	
Conversion of common fractions to decimal fractions	9	
Addition and subtraction of fractions	10	
Multiplication of fractions	11	
Division of fractions	12	
Ratio and proportion	13	
Positive and negative numbers	14	
Addition of positive and negative numbers	15	
Subtraction of positive and negative numbers	16	
Multiplication and division of positive and negative numbers	17	
Square root	18	
Miscellaneous exercises	19	

3. Purpose and scope.-The purpose of this section is to provide a review of the four fundamental operations of arithmetic: addition, subtraction, multiplication, and division. Upon these fundamental operations all other mathematical calculations are based. One or more of them must be used in solving any problem.

4. Addition.-a. Addition is the operation of finding the sum of two or more numbers. To add several numbers, place the numbers in a vertical column so that the decimal points are all in a vertical line. (When no decimal point is indicated, it is assumed to be on the right.) Then add the figures in the right-hand column and place the sum under this column. If there is more than one figure in this sum, write down only the right-hand figure and carry the others to the next column to the left.

Smithsonian National Air and Space Museum Archives

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
