Captain Michael Gitt Papers - War Department, TM 1-900, Technical Manual, Mathematics for Air Crew Trainees, 2/26/1943

Extracted on Apr-17-2024 09:29:38

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian National Air and Space Museum Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian National Air and Space Museum Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian National Air and Space Museum Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian National Air and Space Museum Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

Example: Subtract 765.328 from 843.1.
Solution:

843.100 EXTRA ZEROS
765.328

77.772 Answer
Figure 3.

d. A problem in subtraction may be checked by adding the answer to the number directly above it. The sum should always be the number in the top row.

(1) Example: Check the answer to the example in c(1) above.
Solution:

843.100
add 765.328
----- Check
77.772

843.100
Figure 4.

(2) Units.- As in addition, care must be exercised to be sure that the units of the two quantities in a subtraction are the same.

e. Exercises.- In each of the following exercises subtract the smaller number from the larger. The symbol used to indicate subtraction is the minus sign (-). Therefore, an expression such as "1,205.789-980.833=?" means "What is the remainder when 980.833 is subtracted from 1,205.789?" The number following the minus sign is always subtracted from the number preceding the sign.

- | | |
|--|---------|
| (1) 1,205.789 in.-980.833 in.=? | Answer. |
| (2) 19.52-.78=18.74 | |
| (3) 760,591-674,892=? | |
| (4) 73.44 cu. in.-8.7375 cu. in.=64.7025 cu. in. | Answer. |
| (5) 89.73-10.0045=? | |
| (6) 941.7-87.372=854.328 | Answer. |
| (7) 1,004.78 miles-1,004.164 miles=? | |
| (8) 100,433 sq. ft. - 99,857 sq. ft. = 576 sq. ft. | Answer. |
| (9) 1,000,000.3 - 998,757.4 = ? | |
| (10) 3,756.04 - 2,489.7 = 1,266.34 | Answer. |

6. Multiplication.-a. Multiplication is a short method of adding a number to itself as many times as may be indicated. The numbers multiplied together are called the factors and the result of the multiplication is called the product. To multiply two numbers together, or in other words, to find the product of two factors, first write

Example: Subtract 765.328 from 843.1.

Smithsonian National Air and Space Museum Archives

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
