The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

Cyanerpes, I 1
November 3, 1957
Barro Colorado

I have a pair of C. cyaneus, here, given me by Mrs. [Marciay?]
white ring, left leg
yellow ring, right leg
These are quite tame and settling down quite well. Haven't shown very much behavior as yet, however
When they are disturbed by me, they fly around quite a bit, landing here, there, and everywhere. Generally standing in a variety of unruffled, sleek; elongate postures. When landed, the crown feathers of the are sometimes sleek, but more often ruffled (CR). Sometimes these feathers go up & down repeatedly quite frequently. The ruffling is almost strictly confined to the turquoise feathers on top of crown, sometimes involving a few of the sapphire feathers of the nape.
Both & sometimes utter a single, loud, rather harsh "cheep" when flying around. Bill opens & closes. It's noticeable, however, that this call note (CN) is not uttered nearly as frequently as the equivalent CN's of the Goldfinches or Estrildines. (The CN's of the Euphonias are equally rare.) Sometimes; when one bird of the pair lands beside the other, one (usually not the landing bird) or both give a brief display, probably still low intensity. Most of the

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
