Journal kept by Bailey on field trip to Wyoming and New Mexico, March 15-June 1906

Extracted on Apr-24-2024 03:34:18

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

6. Journal.

March 19. Woke up at Hanna, west of Laramie. Clear & cold. Snow much blown but apparently 8 or 10 inches deep. covers the sage brush in places, all blown off from smooth ground, drifted over fences & rocks.

Otoecoris abundant & happy.

Cottontail tracks numerous

Rawlins - 7:30

While at breakfast some herds of sheep were passed & many dead sheep seen along fences. Some had been partly eaten.

Saw lots of coyote tracks & two coyotes standing 20 rods from R.R.

They looked big & fluffy & well fed. One trotted over & began eating a dead sheep.

Cotton tails seem happy, sitting on sunny slope in the snow nibbling bushes. They are fluffed up in furry balls. Saw one Lepus campestris sitting by a sagebush - looked like a snowball.

Saw another running & a good many tracks.

Prairie dog mounds are all filled with snow.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
