The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

Photo : color Ektec. coll # 1 ? begining of the
 In secondary with some cocoa plants. ^ Very
 Small plants in dense clumps near trail. (Looks like a little
 Selmanta?)
 It does not look like an Olyreo. because the growth habit ~~is~~
 a very dense and compact.
~~Small plants in dense~~
~~clumps near trail.~~
 (looks like a little Selmanta)
 It does not look like some
 Olyreo because the growth habit
 is very dense and compact.
 P. Epiphyte: with plume and
 both sides, expresses normal edges
 in the 3rd phase, excellent.
 Mostly all of the infl. in separate
 short shoot cores by a ripe
 leaf blade.
 Leaves with white spot probably a disease. Many seedlings were found
 within the clumps.
 Sentrok within the clumps.

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
