AIRMAIL

Miss J. Scrymgour
South Australian Museum
North Terrace
Adelaide, Australia 5000

Dear Miss Scrymgour,

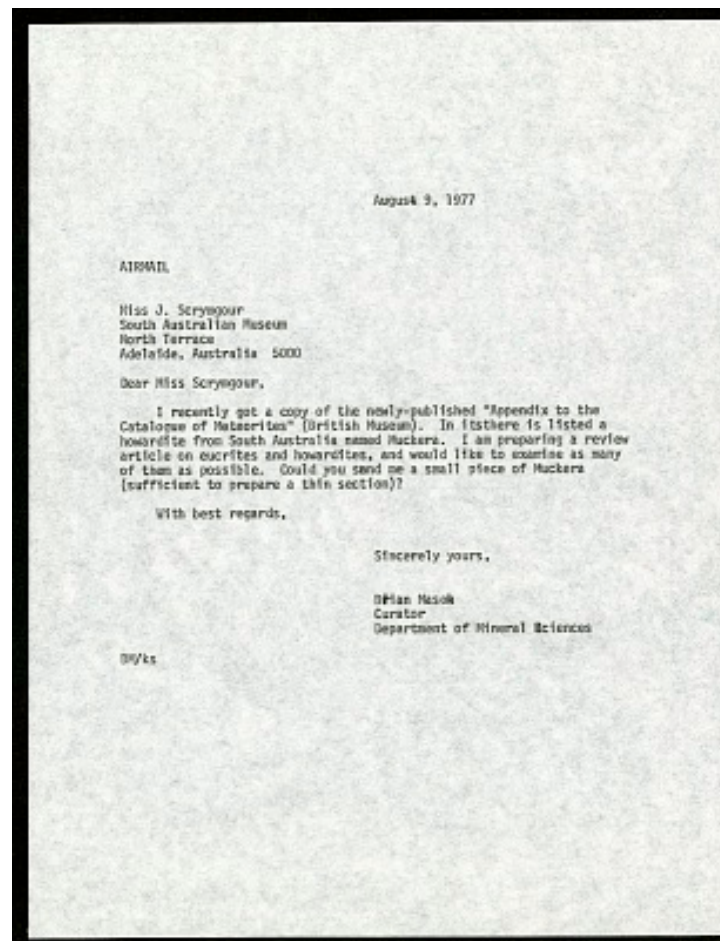

I recently got a copy of the newly-published "Appendix to the Catalogue of Meteorites" (British Museum). In it there is listed a howardite from South Australia named Muckera. I am preparing a review article on eucrites and howardites, and would like to examine as many of them as possible. Could you send me a small piece of Muckera (sufficient to prepare a thin section)?

With best regards,

Sincerely yours,

Brian Mason
Curator
Department of Mineral Sciences

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
