14 July 1976

Mr. Walter Ferguson  
37 Gordon Road  
Auburn, N.S.W. 2144  
Australia

Dear Mr. Ferguson:

Thank you very much for your letter of 22 June addressed to the Curator of Meteorites, and for the report of your observation of June/July 1946.

From your description it appears that what you observed was indeed a bright fireball, and you were fortunate in having seen this phenomenon. Very bright meteors such as this are relatively rare.

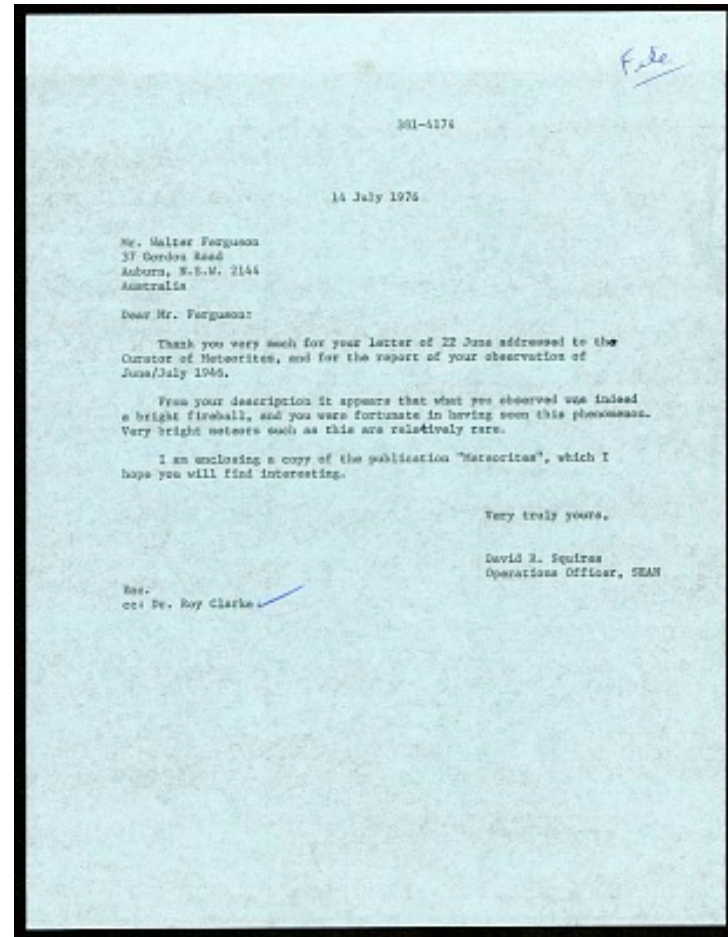

I am enclosing a copy of the publication "Meteorites", which I hope you will find interesting

Very truly yours,

David R. Squires  
Operations Officer SEAN

Enc.

## Smithsonian Institution

*Smithsonian Institution Archives*

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
