The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

December 15, 1976

AIRMAIL

Dr. V.K.S. Varadan
Geological Survey of India
27, Jawaharlal Road
Calcutta 13, India

Dear Sir:

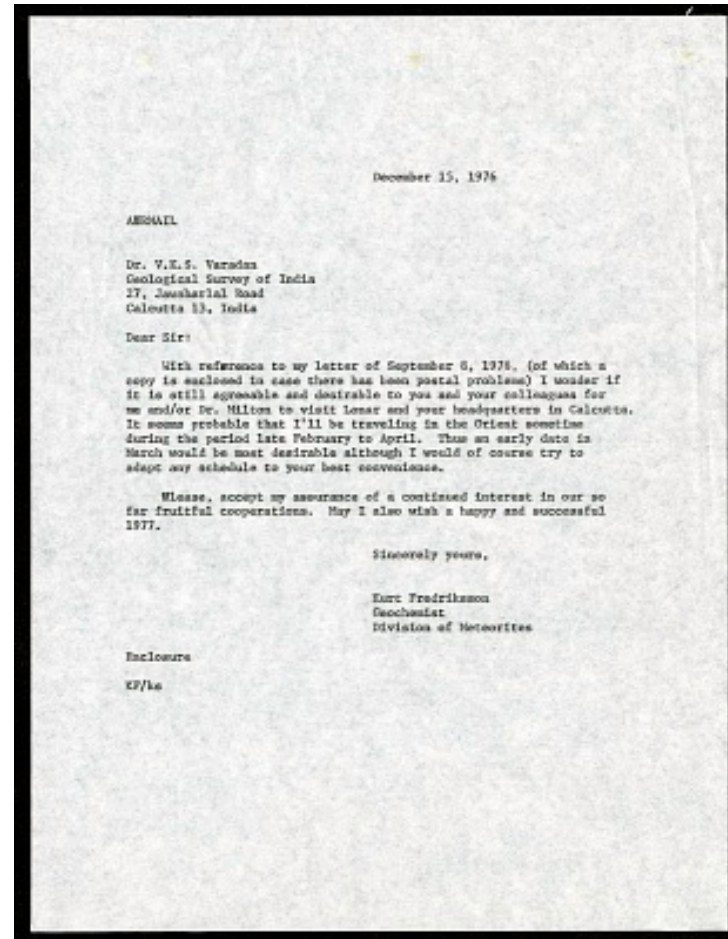

With reference to my letter of September 8, 1976, (of which a copy is enclosed in case there has been postal problems) I wonder if it is still agreeable and desirable to you and your colleagues for me and/or Dr. Milton to visit Lonar and your headquarters in Calcutta. It seems probable that I'll be traveling in the Orient sometime during the period late February to April. Thus an early date in March would be most desirable although I would of course try to adapt any schedule to your best convenience.

Please, accept my assurance of a continued interest in our so far fruitful cooperations. May I also wish a happy and successful 1977.

Sincerely yours,

Kurt Fredriksson
Geochemist

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
