Mr. Wayne A. Mills  
c/o Scientific Attache  
American Embassy  
Chanakyapuri  
New Delhi-21, India

Dear Wayne:

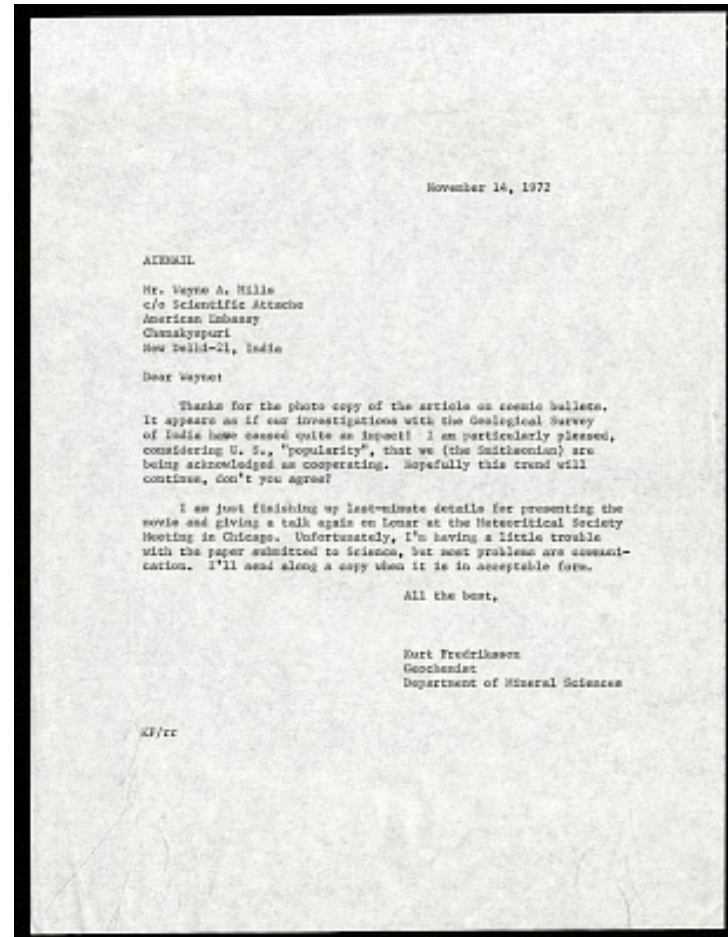

Thanks for the photo copy of the article on cosmic bullets. It appears as if our investigations with the Geological Survey of India have caused quite an impact! I am particularly pleased, considering U.S., "popularity", that we (the Smithsonian) are being acknowledged as cooperating. Hopefully this trend will continue, don't you agree?

I am just finishing up last-minute details for presenting the movie and giving a talk again on Lomar at the Meteoritical Society Meeting in Chicago. Unfortunately, I'm having a little trouble with the paper submitted to Science, but most problems are communication. I'll send along a copy when it is in acceptable form.

All the best,

Kurt Fredriksson  
Geochemist  
Department of Mineral Sciences

## Smithsonian Institution

*Smithsonian Institution Archives*

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
