The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

October 10, 1972

AIRMAIL

M. V. N. Murthy
Petrology Division
Geological Survey of India
27 Jawaharlal Nehru Road
Calcutta 13, India

Dear Dr. Murthy:

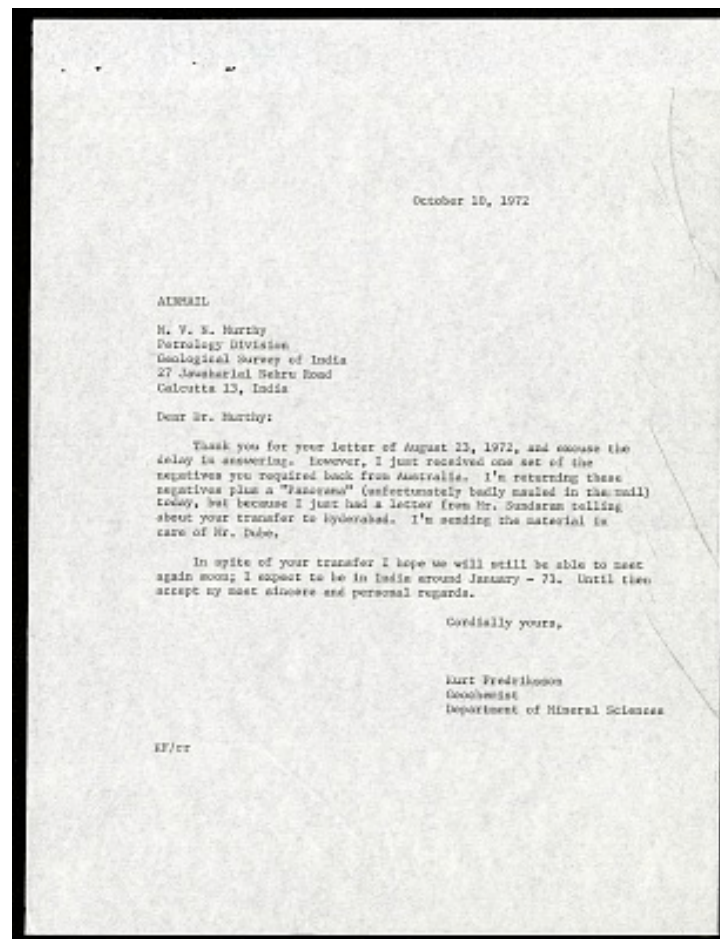

Thank you for your letter of August 23, 1972, and excuse the delay in answering. However, I just received one set of the negatives you required back from Australia. I'm returning these negatives plus a "Panorama" (unfortunately badly mauled in the mail) today, but because I just had a letter from Mr. Sundaram telling about your transfer to Hyderabad. I'm sending the material in care of Mr. Dube.

In spite of your transfer I hope we will still be able to meet again soon; I expect to be in India around January - 73. Until then accept my most sincere and personal regards.

Cordially yours,

Kurt Fredriksson
Geochemist
Department of Mineral Science

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
