The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the following terms.

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. See this project and other collections in the Smithsonian Transcription Center.

April 26, 1971

AIRMAIL

Professor B. C. Haldar
Inorganic and Nuclear Chemistry Laboratory
Institute of Science
Madam Cama Road
Bombay-32, India

Dear Prof. Haldar:

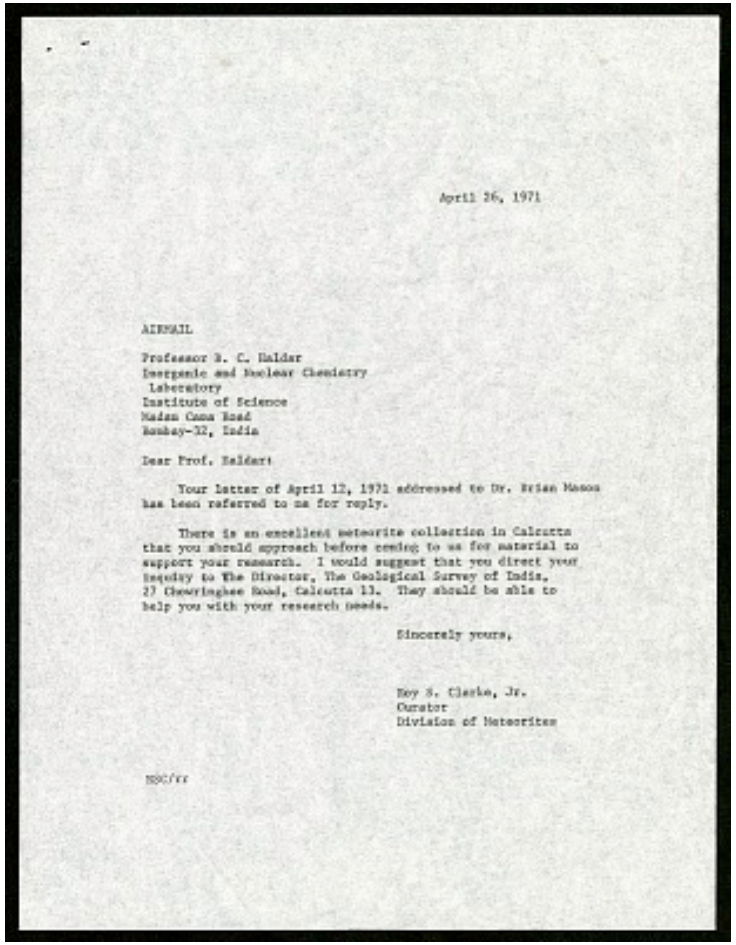

Your letter of April 12, 1971 addressed to Dr. Brian Mason has been referred to me for reply.

There is an excellent meteorite collection in Calcutta that you should approach before coming to us for material to support your research. I would suggest that you direct your inquiry to the Director, The Geological Survey of India, 27 Chowringhee Road, Calcutta 13. They should be able to help you with your research needs.

Sincerely yours,

Roy S. Clarke, Jr.
Curator
Division of Meteorites

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities.Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
