Brief Report on Trip to Ecuador, Peru, and Bolivia, May 25, 1923, to February, 18, 1924. A. S. Hitchcock

In order to place on record the economic results of the trip they will be here outlined, though the results of technical botanical interest will be presented in detail later for publication. It should be noted, however, that the botanical information obtained is the real basis for a complete knowledge of the grazing industry of the countries visited. For work in Ecuador financial aid was contributed by the Gray Herbarium of Harvard University and the New York Botanical Garden, which institutions shared in the specimens obtained.

## Itinerary.

I left New York May 25th on a Panama Railroad steamer for Panama where I remained a few days until I could sail on the Peruvian Line for Guayaquil, at which Ecuadorean port I arrived June 16th. For two weeks headquarters were made at Guayaquil. Through the kindness of Mr. Orr, geologist, and Mr. Clark, Manager, I was able to spend about a week at the Oil Camp, between Guayaquil and Salinas, where the Standard Oil Company was drilling a test well.

About July 1 I went to Huigra where I made my headquarters for four weeks. Huigra is a station (4000 ft.) on the railroad from Guayaquil to Quito, the only railroad of importance in Ecuador. Excursions were made up and down the railroad and to several places on the coastal plain, namely, to Milagro, a sugar plantation, managed by Mr. Perez, to Teresita, a banana plantation, owned by Mr. Cleveland, and to Plantation Panigón

solef seject on Trip to Scander, Pers, and Bolivia, May 25, 1969, 68 subreary 15, 1964. E. S. Sitzhnook.

In arrise to phase on robert the economic results of the twip they will be have outlined, though the results of tooknical botunical interest will be presented is detail later for publication. It should be noted, however, that the botanical information stained is the real basis for a complete knowledge of the grading industry of the constrine visited, for work in intensity financial old was contributed by the form Sectorion of Horeard University and the New York Lotenies) Sectors, which institutions shared in the speciments obtained.

## Itinerary.

I left Hem Verk Heg 20th on a Honorm Hollread standar for Honorm Verto I received a few dags until I ovald sell on the Perrytan line for Bonymquil, at vides Boundarean port I arrived June 16th.

For two weeks handquarters were node at Dosymptil. . Surrage the closures of Hr. Orr. coelectot, and Hr. Clark, Hanager, I was allo to openi about a week at the Dil Gaup, between (saysouth and Callens, shore the Standard Oil Coupley was drilling a test well.

Also t July I I sent to Hidge where I hade my brodgeneters for four works. Holgen is a station [4000 f%.] in the relived from despectil to outs, the only relived of inportance in Honsier. Associations were safe by out down the relived and to serveral places on the fearmal plain, monthy, to Hinger, a reput placettion, managed by Hr. Berei, to Perseite, a human plantation, work by Hr. eleveland, uni to Hampatian Parkers
