The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

12.

perfectly delightful. This opportunity of seeing the glaciers and the Bare spots of Land with much Bird life. Then afternoon and night of August 16th going through the ~~[[Strikethrough]]~~ ~~[[W?]]~~ ~~[[Strikethrough]]~~ Vaigat, the Strait~~[[?]]~~ separating Disko Island from Nugsuak peninsula will I don't believe be forgotten by many of us.

The Sun was slowly sinking to the N.W. and it's beautiful colour effects Cooverd the Land and Glaciers of the opposite shores of the strait. The mountains on opposite sides are 3 to 4000 feet high. You can imagine what the summits of the Snow capped mountains looked like. Going in we saw the Rock which at half tide is Coverd; a dangerous thing. Many large Bergs were grounded close to it and it is steep - too. One could Easily pass ~~[[Strikethrough]]~~ ~~[[?]]~~ ~~[[Strikethrough]]~~; and not see it. because; of the Bergs. I was delighted on arriving at Godhavn

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
