*Anomochloa marantoidea* Brongniart  
Bahia, Brazil

Mun. de Una. Elev 180-190 m. Dark, humid forest on steep, rocky slope of mixed, rich soil. Very large trees and abundant Marantaceae, Rutaceae, and many ferns in the understory. Also common a small Olyra sp. (CEC et al. 2382), Pharus sp., etc. Forming thick, large clumps, mature plants up to 80 cm tall; near the edge of forest, in slightly disturbed areas, plants shorter and in smaller clumps. Graceful dark green, thin leaves with sheath wide open, flat, all in one plane (Iris type). Each new plant develops in right angles to the previous.

## Smithsonian Institution

*Smithsonian Institution Archives*

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
