H. G. Dyar - Bluebook 415-435, 1893-1894

Extracted on Jan-18-2022 05:10:28

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website (transcription.si.edu), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Institution Archives as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Institution Archives website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Institution Archives or transcribe@si.edu

For more information on this project and related material, contact the Smithsonian Institution Archives. [See this project](#) and other collections in the Smithsonian Transcription Center.

~~blue pencil strikethrough~~

417

VI ~~VI~~ Hd retracted, ~~suteus?~~ marked, orange veluaceon?, labrum & bases of antennae yellow w. 3 mm Body gray ~~punctured & wrinkled, intermingled - mostly of fine white streaks and minute black dots /~~ A not well defined white d. line with minute black dots in it. S-d line obsolete but its location marks a boundary where the color becomes darker gray laterally. Warts ~~1 - 3~~ ~~conulavous?~~, same pearly gray. Wart ~~4~~ orange. A bright yellow ~~narrow~~ band ~~insertion, right margin~~ Traces of yellow lat. line ~~insertion~~ s-s line. Warts ~~5~~ ~~ray~~ ~~6~~ whitish ~~insertion~~ with bases yellow like s-s line. ~~insertion~~ The feet orange like head and ~~orange~~ tinted ~~strikethrough~~ Hair dense, even length, pointed bristly, heavily spirulated black & white about evenly mixed. From tho. segs. & 12-13 a few slender nearly smooth white hair of great length 15-17 mm. A neat silvery grey larva. Other same but grey is 2 shades darker, & most of the hairs are black. S-v region pale, yellowish, with black s-v divided seg. patches. Difference caused mainly by the hair Sept 15 ~~one coon Imagos June 1894~~ ~~blue pencil strikethrough~~

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
