## Isaac Newton Manuscript: Ex Fabri hydrographo spagyrico

Extracted on Jun-18-2025 02:08:40

The Smithsonian Institution thanks all digital volunteers that transcribed and reviewed this material. Your work enriches Smithsonian collections, making them available to anyone with an interest in using them.

The Smithsonian Institution (the "Smithsonian") provides the content on this website ([transcription.si.edu](https://transcription.si.edu)), other Smithsonian websites, and third-party sites on which it maintains a presence ("SI Websites") in support of its mission for the "increase and diffusion of knowledge." The Smithsonian invites visitors to use its online content for personal, educational and other non-commercial purposes. By using this website, you accept and agree to abide by the [following terms](#).

- If sharing the material in personal and educational contexts, please cite the Smithsonian Libraries as source of the content and the project title as provided at the top of the document. Include the accession number or collection name; when possible, link to the Smithsonian Libraries website.
- If you wish to use this material in a for-profit publication, exhibition, or online project, please contact Smithsonian Libraries or [transcribe@si.edu](mailto:transcribe@si.edu)

For more information on this project and related material, contact the Smithsonian Libraries. [See this project](#) and other collections in the Smithsonian Transcription Center.

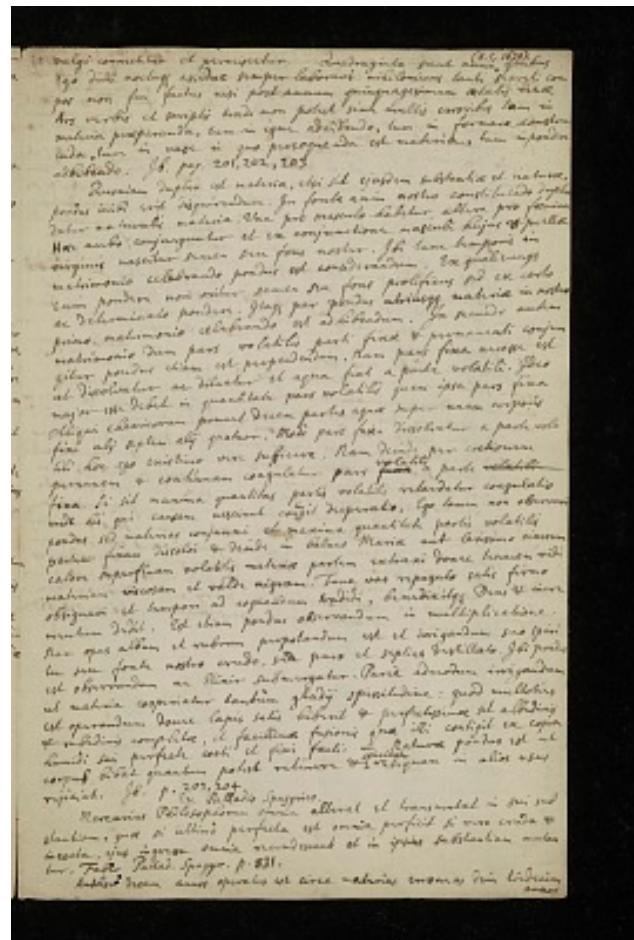

vulgi connectitur et permiscetur. Quadraginta sunt anni [[insertion]] (A.C. 1639) [[/insertion]] quibus ego dice [[noctuqs?]] assidue semper laboravi nihilominus tanti secreti com pos non fui factus nisi post annum quinagesimum æsatius meæ Ars verbis et scriptis tradi non potest sine multis erroribus [[tum?]] in materia præparanda, tum in igne adhibendo, tum in fornace constra enda, tum in vase in quo percoquenda est materia, tum in pondese adhibendo. Jb. pag. 201, 202, 203

Quoniam duplex est materia, etsi sit ejusdem substantiæ et naturæ, pondus inibi erit disquirendum. In fonte animo nostro [[constilucado?]] duplex datur naturalis materia. Una pro masculo habetur, altera pro fœmina Hœc ambo conjunguntur et ex conjunctione [[in?]] asculi hujus & pueræ virginis nascitur semen seu fons noster. Jbi tunetemporis in matrimonio celebrando pondus est considerandum. Ex qualicunq; enim pondera non oritur semen seu fons prolificus sed ex certo ac determinato pondere. [[Jtaqs?]] par pondus [[utriusq?]] materiae in nostro primo matrimonio celebrando est ad hibendum. In secundo auteum matrimonio dum pars volatilis parti finæ & permanendi conjungitur pondus etiam est perpendendum. Nam pars fixa necessa est ut dissolvatur ac diheatur et aqua fiat a [[parte?]] volatili. Idco major esse debet in quantitate pars volatilis quam ipsa pars fixa Aliqui chemicorum ponunt decem partes aquæ super unam corporis fixi alij septem alij quatuor. Modò pars fixa dissolvatur a parte volatili hoc ego existimo vera sufficere. Nam deinde per coctionem perennem & continuam coagulatur pars [[strikethrouh]] fixa [[/strikethrough]] volatilis a parte [[strikethrough]] volatili [[/strikethrough]] fixa. Si sit maxima quantitas partis volatilis vetardatur coagulatio unde his qui causam nesciunt con[[insertion]] [[^tis?]] [[/insertion]]git desperatio. Ego tamen non observavi pondus sed materias conjunxi et maxima quantitatia partis volatilis partem fixam dissolvi & deinde in baluoe Mariæ aut levissimo cineorem calore superfluam volatilis materiae partem extraxi donec tenacem vidi materiam viscosam et valde nigram. [[Tune?]] vas repagulo satis firmo obsignavi et tempori ad coquendum tradidi, [[benedixilqs?]] Deus & incre mentum dedit. Est etiam pondus observandum in multiplicatione. Nam opus album et rubrum perpotandum est et irrigandum suo spiri tu seu fonte nostro crudo. Sed puro et septies destillato. Jbi pondus est observandum ne Elixir submergatur. Parcè admodum irrigandum ut materia cooperiatur tantum glady spissitudine: quod multoties est operandum donec lapis satis biberil & perfectissimæ sit albidinis & ribedinis completæ, et facilimæ fusionis quæ illi contigit ex copia humidi sui perfecte cocti et fixi facti. - Naturæ pondus est ut corpus bibat quantum potest retinere & [[insertion]] ^ spiritum [[/insertion]] reliquum in alias usus rejiciat. Jb. p. 203, 204

Ex Palladio Spagyrico.

Mercurius Philosophorum omnia alteral et transmutat in sui substantiam, quæ si ultimò perfecta est omnia perficit si vero cruda & incocca, ejus ingressu omnia recrudescent et in ipsius substantiam mutantur. Faber Pallad. Spagy. p. 831.

Author decem annos operatus est circa materias erroneas dein [[tórdecim?]] annos

The mission of the Smithsonian is the increase and diffusion of knowledge - shaping the future by preserving our heritage, discovering new knowledge, and sharing our resources with the world. Founded in 1846, the Smithsonian is the world's largest museum and research complex, consisting of 19 museums and galleries, the National Zoological Park, and nine research facilities. Become an active part of our mission through the Transcription Center. Together, we are discovering secrets hidden deep inside our collections that illuminate our history and our world.
